

Bayesian Methods in Clinical Trials
Pavel Mozgunov, Thomas Jaki, Libby Daniells
22–23 September 2026

Day 1: A primer in Bayesian design and analysis of clinical trials

Time	Content
09:00 – 09:40	L1: Clinical trials and the role of statistics
09:40 – 10:30	L2: Introduction to Bayesian statistics
10:30 – 11:00	COFFEE BREAK
11:00 – 11:30	L3: Prior specification
11:30 – 12:00	Practical I – Elicitation of expert opinion
12:00 – 13:00	LUNCH
13:00 – 14:00	L4: Implementation of Bayesian designs in JAGS
14:00 – 15:30	Practical II – Bayesian fixed-sample designs
15:30 – 15:50	COFFEE BREAK
15:50 – 16:30	L5: Two – or multi-stage clinical trials in classical framework

Day 2: Bayesian adaptive methods for clinical trials + special topics

Time	Content
09:00 – 10:00	L6: Bayesian methods for interim analyses
10:00 – 11:00	L7: Basket trial designs
11:00 – 11:30	COFFEE BREAK
11:30 – 13:00	Practical III – Borrowing of information
13:00 – 14:00	LUNCH
14:00 – 15:00	Practical IV – Bayesian sequential designs
15:00 – 15:30	COFFEE BREAK
15:30 – 16:30	L8: Design and analysis of clinical trials using historical information
16:30 – 17:00	Miscellaneous questions and comments
